The claim rejections under 35 USC 101 have been withdrawn due to Applicant's amendment.

***Allowable Subject Matter***

Claims 2-12, 15, and 23-30 are allowed.

The following is an examiner's statement of reasons for allowance:

1. **As per independent claims 1, 12, 15, and 23, the best prior art**, Tiedemann, Jr. et. al (US Patent Number 5,862,471), which discloses a method an apparatus for providing roaming indication with charge information, in view of Kowarsch (US PG Pub. 2004/0132449), which discloses a method an apparatus for permitting a mobile station to operate in a visited network, does not disclose or fairly teach:

linearly predicting by the service provider's server whether the user will pay on-time and in-full for the requested communications service based on a determination whether the user timely paid in-full for previous communications services;

if a determination is made that the user will not pay on-time and in-full for the requested communications service, then declining to fulfill the request for the communications service;

if a determination is made that the user will pay on-time and in-full for the requested communications service, then:

negotiating with other service providers to fulfill the request for communications service;

accessing a segmentation profile containing user preferences for presenting billing charges from the other service providers;

determining a subcontracted processing service is required from a different service provider;

grouping together individual packets of data that require the subcontracted processing service as a new segment;

subcontracting the new segment from the service provider's server to the different service provider to receive the subcontracted processing service

2. **The best NPL prior art**, "Sample Selection in Credit-Scoring Models" herein referred to as "Greene", does not disclose or fairly teach:

if a determination is made that the user will pay on-time and in-full for the requested communications service, then:

negotiating with other service providers to fulfill the request for communications service;

accessing a segmentation profile containing user preferences for presenting billing charges from the other service providers;

determining a subcontracted processing service is required from a different service provider;

grouping together individual packets of data that require the subcontracted processing service as a new segment;

subcontracting the new segment from the service provider's server to the different service provider to receive the subcontracted processing service

3. The remaining dependent claims are considered allowable, as they are dependent and based off of an allowable independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
